

HUMAN RACK

DESCRIPTION

The Human RACK is the ideal companion for storing our product Human Weight.

With its sleek design, it blends perfectly into any professional or home setting.

Crafted entirely in Italy, it features cutting-edge technology and a keen attention to detail, from the choice of materials to the finishing touches.

TECHNICAL FEATURES

The frame is made of steel, with a transparent polycarbonate panel that enhances the Human Rack, creating what we call the "Ghost Effect."

The Ghost Effect occurs when the weights appear to float in mid-air, as the extra-clear polycarbonate is almost invisible when supporting the weights.

The design of the structure echoes the geometry of the Human Bench, immediately conveying a sense of design unity and perfect integration within the Canali world.

Designed to hold 10 dumbbells.
Steel frame.
Powder-coated finish.
Extra-clear 20mm thick polycarbonate panels.

TECHNICAL SPECIFICATIONS

Length	160 cm
Width	60 cm
Height	20 cm
